LAST EDITION

Five articles of the possible "treats of Washington" remained to be con-bidered when the peace pleulpotentiar sidered when the peace plenipotentiaries resumed their session at the navy pard. Sakhalin upon which it had been impossible to sgree and which had been passed over; indemnity; limitation upon Russia's sea power; the surgender of the interped warships and render of the Interned warships at the grant of fishing rights on the Li

article to come up today.

How far it will be threshed out be fore it is passed over is problematical. Fishing rights Russia will yield. There buly remain limitation upon Russia's see power and the sourender of the interned worships.

FINAL ROUND COMING UP.

The final struggle is close at hand d preparations are being made for When the remaining points of pos-

it. When the remaining points of possible agreement are demonstrated an
adjournment will be taken probably until Monday when the plenipotentiaries
will show their last cards.

The Japanese are in the closest touch
with their government. They are keepting Tokto advised of every development
of the proceedings. It was six o'clock
this morning when last night's stream
of cables to Japanese was campleted.
The weather since the arrival of the
plenipotentiaries has strangely followed
the prevailing sentiment as to the outthe prevailing sentiment as to the out-come. Today was bright and cheery. The sun shone gloriously. It was an-other page out of the wonderful wen-ther book to which New England has treated her distinguished foreign guests. Last week the heat was unbearable and the plenipotentiaries were testy and an gry. Saturday was cool and dreary an But it did not and the fear that nego-tiations might be broken off when the meeting occurred in the afternoon af-ter the presentation of the Russian re-

ply was happily averted.
Sunday was fair and bright. Tuesday it stormed and in the conference room the first unsurmountable barrier appeared—the cossion of Sakhalin. Yes-terdey afternoon the weather, cleared and the plenipotentiaries while return-ing to the hotel were treated to the sight of a glorious New England sun-

KOMURA GIVES \$500.

Donates That Sum to the Scattle Japanese School.

Seattle, Wash. Aug. 17.—President C. T. Takahashi, of the Seattle Japanese association, has received a draft in the sum of \$500 from Baron Komura, donated by the distinguished statesman of Nippon to the Japanese school of this city on the occasion of his visit to Seattle last month.

The course of the school consists principally of Japanese language and

TAKES UNCLE HOME.

Sequel to the New York Poor House Incident

New York, Aug. 17.—J. T. Rapise, an aged broker, said to have been once worth \$500,000, and who recently obtained refuge to Westchester poorhouse, after having lived up to his fecture, was rescued yesterday by a stylishly dressed woman, who said she was his nice. The woman told the officials that she had made arrangements to keep him for the remainder of his days. "My uncle has no excuse for being in the poor house," said she, "If he had taken care of his money, he could now be living in a mansion on Fifth ave-

CLERK MISSING.

With Him Also \$20,000 of Equit-

able Trust Co's Money. Chicago, Aug. 17,-Walter P. Kraft. the transfer clerk of the Equitable Trust company, is missing, and it is said by the officials of the company company's money. It is ascertained that the Trust company will lose nothing, as brokers through whom stock was sold by Kraft will be forced to refund to the company the values of the shares taken by Kraft, but have no clew to his whereabouts at the present

DUTCH POST ATTACKED.

Only Six Men Escaped the Fury Of the Natives.

Amsterdam, Aug. 17.—A telegram re-ceived from Batavia, Dutch East Indies, reports an ugly outbreak of Achinese rebels, who attacked the Dutch post at Rambong, killing two officers and 22 men. Only six men of the post succeeded in escaping and these were wounded

YELLOW JACK NOW BOBS UP IN GOTHAM

Fever Scare Caused by a Case Being Unearthed in Brooklyn Yesterday.

OPTIMISM IN NEW ORLEANS.

Insignificant Number of Deaths During Past Twenty-four Hours Raises Spirits of Citizens.

New York, Aug. 17 .- A yellow fever scare was caused yesterday in First avenue. Brooklyn, when a doctor sumnoned to a tenement found John G. Murphy, a laborer, violently ill, During a lucid moment he said he came from Panama a few weeks ago. At the Norwegian hospital the physicians Norwegian hospital the physicians agreed that Murphy had a mild case of yellow fever. The health department was notified and its agent reported that he found certain symptoms of typhoid inalaria and had suspicions that his fellow physicians were right in their opinion that Murphy has yellow fever. He ordered Murphy placed in an isolated ward. An effort will in an isolated ward. An effort will be made to find out what steamer brought the man here.

IS LOSING VIRULENCY. New Orleans, La., Aug. 17 .- The relatively insignificant number of death here in the past 24 hours at a time when it was stated there would be some increase over the maximum figures already reported has made a fine impression on the local public confirming the consequently expressed view that the disease is losing its virulency to contact with modern forms of treatment. Of the 19 new squares infected. 12 are immediately joining the squares ment. Of the 19 new squares infected. 12 are immediately joining the squares previously reported as infected, showing the light spread of the disease. A list of 18 suspicious cases reached the marine hospital officers, after the report closed and were under investigation today. A fine showing was made by the physicians, 47 of the 66 cases being reported from their private practice. Ten more were reported by the Emergency hospital. Twenty-two of the cases were in the originally affected area. Only five new foci were above Canal street, three adjoining squares already infected.

NEBULAR TREORY.

Prof. Moulton of University of Chicago Advances New One.

Chicago, Aug. 17.—Laplace's "Ring" theory of the nebular hypothesis for the creation of the universe, which has stood service for more than a century in the scientific world, was torn to pieces yesterday by Prof. F. R. Moulton of the University of Chicago, who believes that he has made the real solution of the evolution of our solar system.

for more than four years to disprove the "Ring" theory, and to set up what There has been no communication results of their researches were

repair.

The next port at which the party will by Laplace in 1396, and has been accall, will be Cebu, in the Viscayas islands, where the steamer is due to ar-

"The theory which Prof. Chamber-lain and myself hold is the spiral theolain and myself hold is the spiral theory. We believe a second sun—a disturbing sun—moved down near our sun and caused on our sun enormous tides, thousands of miles high. The tides were similar to the tides of the sea. One tide was at the point nearest the disturbing sun and the other tide was on the opposite side. The matter shot towards the disturbing sun. Ordinarily it would have been straight up, but the disturbing sun moved around in an eliptical sort of orbit. Consequently all the masses thrown off were in a spiral direction, one after another which accounts for the orbits of the planets. The swollen masses were attracted to the large nuclei which made them into planets. them into planets,

JEWS RIGHTS IN RUSSIA.

SHOT POACHERS.

Sons of Henry Phipps Arraigned
In Scotland on Charge.

Inverness, Scotland, Aug. 11.—Juy 8.
Phipps and Henry Carregle Phipps, sons of Henry Phipps of Pittsburg, Ph., were formally arraigned teday in the high court on the charge of shooting at Salman fishers on the Beauly river and pleased "not guilty." The case was remitted for trial at Edinburgh. The defendants contended that they merely fired in the direction of supposed poachers and had no idea of hitting them.

MINING, BUSINESS AND STOCKS

M'CORNICK HAS ONLY VALID OPTION

Story That White Knob Copper Company Will Not Get Balaklalla Mine Exploded.

WHAT A BOSTON PAPER SAYS.

I. A. Ceram Had an Option and Sold Mine to Englishmen but He Acted Too Late.

A Boston publication which reached he city during the day contained an article to the effect that there had been hitch in the proceedings now pending for the sale of the Balaklalla copper mine in Shasta county, California.

In substance, the paper stated, that the mine had been sold twice and that the chances were that the White Knob Copper company, which had already made a payment of \$50,000 on the purhase price of \$1,435,000, would probably get left and that the hopes of the White Knob stockholders that the company's management would make good on its \$3,000,000 loss in an Idaho mining yenure, were dashed to pieces.

Secretary C. O. Ellingwood of the Secretary C. O. Ellingwood of the Western Exploration company, which operated the property, stated before leaving for California, this afternoon that there is nothing to the Boston story; that Charence K. McCornick holds the only valid option; that while it is true, as the paper stated, that J. A. Coram, president of the Bingham Consolidated, was given an option, and who is said to have made a sale of the property in England, he woke up too late to do business with any authority.

Mr. Ellingwood says stockholders of the White Knob company can rest asthe White Knob company can rest assured that company is going to get the property if the balance of the payments

FILES FIRST DEED.

American Smelters Securities Company Now an Owner of Utah Real Estate. In the office of the county recorder today was filed a deed in which the Am-

erican Smelters Securities company of New Jersey is named as grantee and Alonzo P. Kessler Donnett Kessler, his wife and Henry M. Dinwoodey, Flor-ence W. Dinwoodey, his wife, are the grantors. The following description of the property is given; Beginning at the northwest corner of ection 15, township 1 south, of range 2 west, Sait Lake meridian, and running east 320 rods; thence south 160 rods;

I thence west 56 rods; thence south 160

DALY-WEST MAKES

\$

A GOOD SHOWING.

A glatement showing the resuit of the operations of the Daly West Mining company covering the anonth of July was made public today, which shows that the receipts of the company during that period from all sources amounted to \$105,333.68. The disbursoments aggregated the sum of \$52,736.32, leaving a net profit of \$52,597.36. Out of this sum was transferred to the dividend account \$36,000 and \$3,100 to be applied in the payment of fire insurance and taxes.

Compared to the month of June the July record shows a gain in receipts to the amount of \$19,. 956.54, while the operating ex- ? penses were \$1,221.98 less.

rods; thence west 264 rods; thence north 820 rods to place of beginning, together with water and water rights pertaining

A QUESTION RAISED Regarding Mineral Locations on the Uintah Indian Reservation.

Special Correspondence.

Provo, Aug. 17.—There is now a question in the minds of people interested in mining locations on the part of the reservation to be entered under the drawing, which commences today. It is whether mineral locations can be made on that land after Aug. 28 and before the expiration of the 60 days following, when the land not entered under the drawing will be thrown open to general entry. Special Correspondence.

Lawyers here hold that mineral lo-cations can be made after Aug. 28. Com-missioner Richards says he has submitted the question to the secretary of the interior and to the attorney-gen-eral, but have not received their opin-

GREAT WASHOE SMELTER. Anaconda Plant Turns Out 15,000,000 Pounds of Copper Monthly.

A recent issue of the Anaconda Standard gives some interesting data concerning the great Washoe smeiter at that place, where a large bulk of the ores mined in the Amalgamated proprties at Butte are taken to be smelt

Three months ago the Washoe plant bloke the record for the production of copper, and fixed the new mark at 15,000,000 pounds of the red metal as a month's output. Two months ago another top notch was fixed, which was considerably higher than the one which was made in May. July's showing exceeded that of June, making three months in which the plant has produced more than half a million pounds of copper a day. For records this is pretty good, but if the closing two weeks of August make the same showing that has been made in the fortinght, the Washoe will have outdone itself and will have fixed the figure that represents a month's results at a point represents a month's results at a point which, even a year ago, would have been regarded, if not unattainable, at least not probable of realization. For

There are 2,500 men employed at the smelter and its allied plants. All of these men have their homes in Anaconda. They come and go by night and by day, keeping in constant motion the wheels of the magnificent industry that has built and the state of the magnificent industry that has built and the state of the magnificent industry that has built and the state of the magnificent industry that has built and the state of the magnificent industry that has built and the state of the stat eceiving merited congratulations. dustry that has built up the city; there is no cessation of operations at the big plant on the hill; three shifts each day keep things in motion and one takes up the work where the other leaves it when the shifts change; it is a contin-

As much of the manufacture of this as much of the manufacture of this machinery as is possible is being done at home: the foundry plant is rushed with work and its capacity is being tested these days. All this extra work means employment for more mechanics, and the number of men employed on these additions to the plant would make a payroll that would be beasted of in many towns, though the work progresses here without attracting many attention.

auch attention.
At the Washoe they have recently be-At the Washoe they have recently begun treating the "slimes" collected from the slum ponds below the plant. These "slimes," which are the fine tailings, settled in the ponds, are conveyed to the works and are smelted, adding greatly to the saving of ore values and making the plant by far the most economical of any in the world that is handling copper ores by concentration and smelting.

world that is handling copper ores by concentration and smelting.

For the handling of the "slimes" two large Ledgerwood aerial ropeways are employed, with dredges attached. The first takes the material from the ponds to the piles where it less until it is dry and the other removes it from these piles and transfers it to the cars in which it is taken to the smelter for which it is taken to the smelter for treatment: the amount of metal recovered from this material is considerable and the dredging process by which it is handled is one of the most nteresting operations carried on at

Across the valley at the site of the old upper and lower works, large gangs of men are at work recovering values from what was once considered purely waste material. The values re-covered from this one-time waste are surprisingly large and the acumulathat there is enough to keep the pres-ent operations in progress for a long

SODAVILLE SMELTER.

Nevada Plant Will be Ready for Commission in Ninety Days.

Material and equipment for the new smelter to be erected at Sodaville, Nev., by the Nevada Ore Purchasing, Refining & Smelting company, has begun to arrive and the announcement is made that the plant will be in operation within the next nigety days.

A Salt Lake firm received the contract to supply brick to be used in the construction of the furnaces. The cost of the plant will be about \$182,000. Contracts have been made for ore sufficient to keep the plant going steadily for two years.

CONCENTRATES.

James Quin nhas been retained as superintendent of the Buckhorn mine t Ophir under the new management. William T. Reid of the ore purchasing department of the American Smelting & Refining company, has gone on his

James M. Callow, the well known metallurgical and mechanical engineer, expects to leave for the northwest tomorrow evening.

L. L. Patrick, one of the successful mining men of Goldfield, who is also largely interested in the Bullfrog dis-trict, passed through Salt Lake today on his way from Denver to Nevada

WEST QUINCY FIND

Indications Point it to Be Greatest Event of the Year in Park City.

BIG THING FOR BONANZA FLAT.

Developments Have Disproved the Contentions of Well Known Mining Engineers.

The camp of Park City has been in need of some new strikes of such proportions as would tend to bring about revival there. Mining men have been heard to remark frequently during the past that "if Park City could only open some new mines, the camp would boom." A few months age it looked as if the New York Bonanza, or perhaps, the Wabash, might bring about the desired change. But the process has been slow, and developments have not progressed to the stage as yet where they can be classed among the "big ones" yet the outlook for them is

encouraging.

The most pleasing information that has come from the camp made famous by the Ontario, Silver King and Daly West in a long time is that telling of the change taking place in the West, Quincy mine in the Bonanza Flat sec-tion of the camp. If the ledge en-countered in this property some days ago proves to be a permanent one, and there is every reason to believe it will, it means that the ore zones of the district spread over a vastly greater area than a great many had really supposed. It means that practically a new camp has been opened in Park City, the future of which can only be guessed at.

HAD LONG, HARD FIGHT. Manager G. D. B. Turner of the West Quincy has had a long, hard fight. Some of the best known mining en-gineers in the country contended that the ledges which brought greatness to the Quincy mine did not penetrate in-o the region of the territory embraced in that in possession of the West Quin-y company. Mr. Turner, on the other land, contended that these conclusions hand, contended that these conclusions were wrong, and backed up his judgement with his own money. He went to Scotland and succeeded in raising additional capital after a long, hard struggle. On top of this came difficulties with water, which, at times, seemed almost unsurmountable. The situation was discouraging, indeed, for confronted as the mansary was with a proposed as the mansary was with a proposed. ed as the manager was with a proposition which required immense and expensive pumping machinery the situation was anything but hopeful.

MADE A GOOD DEAL.

Finally, negotiations were opened with the management of the Little Bell operating on the opposite side of the ridge of the mountain and side of the ritige of the mountain and near the Quincy inine, to use the latter's works. A deal was consummated, following which a cross-cut was started towards the West Quincy shaft. The lowest workings of the Little Bell being several hundred feet below the lowest point reached in the West Quincy shaft, it was figured that this would prove by far the most economic means of operation, the drainage through the long avenue doing away through the long avenue doing away with the necessity of pumps. The work of driving this cross-cut has been in progress for a year and is now a long ways over the lines dividing the prop-

Mr. Turner returned to camp this morning and will probably remain in there several days. When he heard from the mine last night there was every reason to believe that the ledge en-countered is a permanent one, yet the cross-cut had only penetrated the hanging wall a short distance. The char-acter of the ore resembles that found in the Quincy mine, and there is every evidence that Mr. Turner's reading of the geology of that region is going to the geology of that region is going to turn out absolutely correct, and that what he has been alming at for so long is going to be accomplished. If such is the case it will be a big victory for Mr. Turner as well as for the camp. An assay made yesterday of the ore showed values of 129 ounces in silver, 18 per cent lead and \$1.80 in gold.

ZING ORE PLENTIFUL.

Managor Harris of Western Ore Separating Co., Makes Investigations.

From Manager Herbert Harris, of the Western Ore Separating company, which recently built a mill for the treatment of zinc ores in the northwestern part of the city, it has been learned that the plant is gradually being adjusted and that within the next few days conditions will be ripe to put on another shift and that the machinery will be kept in motion 24 hours each day, working on 125 tons.

The Blake-Morscher Static Electrical process is used for the seperation of zinc from iron and the precious metal values. After separation the zinc is sent to the Kansas gas belt for treatment and the other values saved from ores is sold to the valley smelters. The plant has been running on iron ore From Manager Herbert Harris, of the

plant has been running on iron ore and middlings from other mills when the zinc values could not be separated. the zinc values could not be separated.

Mr. Harris has been conducting some interesting experiments lately on gangue and chalco pyrite copper ores. Mr. Harris says there is an abundance of zinc ore in the camps in Utah.

Park City has lots of it; so has the Alta, American Fork and Stockton camps. Some of the U. S. mines at Emphan contain quite a let of this

camps. Some of the C. S. mines at Eingham contain quite a lot of this metal, while the Horn Silver at Frisco probably has a half million tons of this class of ore available for treat-At present the railroads operating

out of Montana give a more favorable rate on zinc products than those doing business in this state. In Colorado railroad managers have awakened to the importance of this branch of the mining industry and are giving en-couragement in the way of freight charges on zinc products to the east. MISSOURI PACIFIC LED THE OPENING.

Strength in the Market Was General and the Trading Showed Considerable Animation.

GAINS FINALLY CAVE WAY.

Number of the Eastern Railroad Stocks Receded to a Fraction Below Last Night.

New York, Aug. 17 .- Missouri Pacific led

the opening advance in the stock market

with a gain of 1%. The strength the market was general and the trading showed animation. Northern Pacific jumped 2 and Reading, C. & O. and Amalgamated Copper got up large fractions. Otherwise the gains were moderate. Considerable stock had to be taken before the advance was allowed to proceed, the realising being notably heavy in Reading which fell back below yesterday's close. Atchison also sold under last night but both of these stocks subsequently climbed vigorously when the advance was n full swing again. The Southwesterns Southern and Metal stocks derived the Southern and Metai stocks derived the most benefit from the buying, but there was the substantial rise also in some of the other standard stacks. Great North-ran preferred rose 24, Missouri Pacific 4, Factic Mail 2, Minneapolls, St. Paul and Sault Sie Mario 14, and Union Pacific. Atchison preferred, C. & O. L. & N. Atlantic Coast Line, Delaware & Hudson, C. C. C. & St. Louis, Mexican Pentral, Amsigamated Copper, the Leconotive Stocks, Sloss-Sheffield Steel, Nadional Biscuit, American Agricultural Chemical and Corn Products preferred 1 to 115.

Chemical and Corn Froducts preferred to 114.

Prices met heavily realizing again on the rally and ultimately gave way. St. Paul, Ontario & Western and a number of the eastern railroad stocks receded to a fraction below last night, Kansas and Toxas preferred dropped 14, Lead 14, Allis-Chalmers 14 and the preferred 12, Colorado Fuel preferred sold at decline of 15 points. The gains were in the special-disc United States Reduction rose 24, the preferred 3. Corn Products 1, the preferred 34. Pacific Coast 1, the second preferred 2and Reading second preferred 14. Great Northern rose 14 and the market steaded and became quiter at noon.

Bonds were firm.

PRODUCE.

CHICAGO.

CHICAGO.

Chicago. Aug. 17.—Non appearance of predicted frosts in the northwest over night imparted an easy tone to the wheat market here. Under tree offerings by local longs. September was off at the opening a shade to 1474 at \$1% to \$2, subsequently decling to \$165. Scattered commission house demanded, however, saved further loss in values, steadying the market at the lower level. Minneapolis, Duluth and Chicago reports receipts of 105 cars against 103 a year ago.

Corn opened casy with wheat, September 1/4 lower at 53, and suffered a further decline of 1/5.

Outs opened firm, September 1/4 higher at 27.

at 27.

A firm tone in the market for live hogs imparted a similar tone to provisions. September pork is up 12½ at 14.32½; lard gained 7½ at 7.50, and ribs were up 7½ at 8.67½.

COTTON. New York, Aug. 17.—Cotton futures opened easy, Aug., 9.68; Sept., 10.50; Oct., 16.21; Nov., 10.28; Dec., 10.37; Jan., 10.41; Feb., 10.43; March, 10.48; May, 10.51.

WOOL.

St. Louis, Aug. 17.—Wool, steady. Territory and mediums, 25250; fine medium, 2525; fine, 18218. Nevada Stocks.

Timber Tariff Protests.

Bellingham, Wash, Aug. II.—The chain, ber of commerce today by unanilingus vote, sent to the reciprocity convention now in session in Chicago an emphatic protest against any attempt to remove or modify tariff or timber products. The move was made after receipt of a telegram from Victor II. Beckman, secretary of the Pacific Coast Lumbermen's association, pointing out the grave danger to the lumber industry of Washington lying in any reduction of the duty.

Marines Versus the Gang

New York, Aug. 17.—The guard of marines at the gate of the Brooklyn have yard has been nearly doubled this week on account of the feud existing between the marines and gaing of roughs in the neighborhood.

The feud dates back to the night of Feb. 3 last, when Private Lawrence T. Milton, who was on sentry duty, shot and killed a man who was attempting to steal copper from the yard.

The tilef was a member of a gang that frequents low salcons in the vicinity of the gates and his comrades recently have attempted to make good their threats of revenge by attacking the marines whenever they appeared alone outside the gates.

Terra Nova Salls.

Bergen. Norway. Aug. 17.—The archy stammer Terra Nova, which, under the command of William E. Champ. Secretary of the late William Zeigler, rescued Anthony Flais and the other members of the Zeigler Polar expedition, salies to day for London.

Police Boat Sails.

Halifax, N. S., Aug. II.—The sleamer Neptune, chartered by the Canadish gov-ernment to make a trip to Hudson's bay, salled yesterday. The steamer carries nearly a full cargo of supplies for the mounted police posts in the arctic. Sea also took six members of the mounted po-lice, who are to relieve some of these in the north.
